PREPARING FOR WINTER

Do you hate the cold? Do you fear your heater or furnace will stop working?

We can help ease your mind! There are several things you can do yourself to prevent trouble:

1. Check the batteries in your thermostat.
2. Make sure your filter is clean.
3. If you have Lp, make sure your propane tank is full (no more than 80%).
4. Check the registers are open to allow proper air flow.
5. Call us and schedule a cleaning for your furnace (or air handler) and humidifier. We'll make sure it's in tip-top shape and get you prepared for winter!
