Co-Owner: Kent Beeson

## Come See Us at the Fair!

The Johnson County Fair is July 15-21. As always, we will be in the parade on July 14 at 4pm. Our theme will be new this year, so come check us out!

## Kaden & Keelan Update

Kaden just loves being a big brother to his now 3-month-old little brother, Keelan. He's a big helper (most days). They both love to be outside, Kaden playing on the swingset, and Keelan enjoying the sunshine and breeze. Although mommy doesn't seem to get as much done these days, she's enjoying staying home with them both!

## OUR COMMITMENT!

Our commitment at Beeson Mechanical Service is to provide you the best service at competitive rates. Our slogan is "We Charge The Price We'd Charge Our Moms". We try our best and if there are ever problems, we take care of them to the best of our abilities! Please keep this in mind when you have service you need completed or if you're able to refer us to friends or family!

## Question and Answer

### Why won't my air conditioner "keep up"?

As we all know, it's been a very hot summer so far (although it didn't begin until June 20th). One of the most frequent calls we get is "My thermostat is set on 72 but it's 76 in my house". There's one thing people don't always understand: An air conditioner is designed to dehumidify and cool but it's max design threshold is 98 degrees. If it was designed to keep your house at 72 when it's 105 out, your house would be damp through the rest of the summer (if it was below 98).

### How can I improve my system's efficiency myself?

1. Keep debris away from your unit.
2. All bushes, trees, etc. need to be at least 24" away from your unit.
3. Close blinds and shutters to prevent solar heating through the day.
4. Replace your air filter as scheduled. (Monthly for 1" filters, per manufacturer's recommendations for others)

\*If you have questions you'd like answered, please call or email us for next time!

### Benefits with Beeson™....
