### About Our Sizing Recommendations

**Ask Your Technician How YOU Can be More COMFORTABLE!**

Sizing recommendations are based on tight homes with 0.5 ACH (air changes per hour) in most regions of the country. Regions with high humidity will require more dehumidification, which will cause sizing recommendations to vary. The maximum square footage associated with the Model 1820 pertains to the area of a crawl space. Sizing recommendations for all other dehumidifier models refers to the square footage of the whole home, assuming the home has 8 ft. ceilings.
