- Salt Spreading
- Generators
- Dehumidifiers
- Indoor Air Quality
- Refrigeration
- Network/Communication Install

WITH SPRING COMES AIR

It is that time of year again where you start thinking about turning on your air conditioner (or heat pump). Every year, I have customers inquire on what they can do for the change of seasons regarding their air conditioners.

Here is what we at Beeson suggest:

- 1. Check your filter for cleanliness.** As a general rule of thumb, if you hold your filter up toward a light and you can still see light through the filter, then it's clean enough.
- 2. Check your batteries in your thermostat.** We suggest either checking your batteries (if you have a tester) or simply changing them. This will ensure you do not have a "nuisance" call.
- 3. Spray off your air conditioner/heat pump.** Over time, there will be grass, pollen, and other pollutants that end up on your coil. Simply spray them off with a hose.
- 4. Call Beeson Mechanical Service!** We will do all of the above, plus additionally, we will do a complete cleaning and check on your air conditioner/heat pump. We will ensure everything is working properly when we leave. Over time, this will save you money.

Think of your air conditioner/heat pump like a car. Every few thousand miles, you must get the oil changed in your car to keep it running. This keeps your car running better and saves you money in the long run. The same applies to your HVAC system. MAINTENANCE IS A MUST!

BEESON MECHANICAL SERVICE'S VIP (MAINTENANCE AGREEMENT POLICY) BENEFITS VERSUS AN ADVERTISED 16 PT TUNE-UP

Spring Jokes

- Can February March? No, but April May!
- When do monkeys fall from the sky? During Ape-ril showers!
- What season is it when you are on a trampoline? Spring-time!
- Why is everyone so tired on April 1? Because they've just finished a long, 31 day March!
- Why is the letter A like a flower? A bee (B) comes after it!
